
update

Posted by Cylis_ - 2008/03/14 13:07

The video section is playing most of the videos now. I was unable to play two videos I've tried, "John Bonham Interview - 1980 - Rare" & "John Bonham RARE Drum Solo 1977". The old video is removed but the new video does not load into the space. The space remains gray.

I believe this was mentioned by someone else but it would be cool to be able to search through the list of video titles for a specific word. Or have the videos in different sections like "Rudiments", "Lesson", and "Cool Videos".

Also the error with the email lessons has changed. Now the drum.com header is showing, which never happened before, but the error "404: Not Found. Sorry, but the content you requested could not be found" is displayed.
